## ALL CHECKS MUST BE STAMPED.

**False Impression Corrected by the Commissioner of Internal Revenue.**  
Terre Haute, Ind., Nov. 23.—False impression having got abroad that bank checks which a depositor uses to draw money for himself do not need a stamp, Commissioner of Internal Revenue Wilson telegraphed as follows to Collector Henry yesterday: "The attorney-general has rendered no decision that checks do not have to be stamped when a person checks out money from his own account to himself. All bank checks require a 2-cent stamp, and can not be issued or paid otherwise without the parties concerned incurring legal penalties."

## THE FARMER WON.

**But Schaefer Considers It the Shortest Game of His Life.**

"Some years ago," said a sporting man, "when Schaefer kept a billiard room in this city, he was always ready to play all comers who desired a game. Many strangers and people unknown to Schaefer naturally strolled in; many, too, who probably did not know him. But it made no difference to Schaefer. Sometimes strangers would desire to play for money, but this Schaefer would never do. To all such propositions he would say: 'No, I won't play for money, but I'll tell you what I will do—I will play a game, the loser to treat the house.'"

"One day an old farmer entered the place, and after wandering about looking at the pictures on the walls and examining the tables he asked if there was any one present who would like to play him a game of billiards. Schaefer, as usual, said that he would play the stranger."

"How much shall we play for?" asked the farmer.

"I never play for money," replied Schaefer, "but I will play you for the drinks for the house."

"All right," said the farmer. "How many points shall we play?"

"Oh," replied Schaefer demurely in all the consciousness of his superior powers, "we'll just play until you are satisfied, and we will call that a game." "The crowd smiled as the players prepared for the contest. The balls were placed on the table, and Schaefer brought out his favorite cue, and it fell to his lot to open the game."

"The opening shot in a billiard game is a somewhat difficult one, as most players know, and Schaefer, probably through indifference, missed it. He not only missed it, but left the balls close together near one of the cushions. It was what is termed in billiard parlance a 'set up.'"

"The old farmer carefully chalked his cue, and after deliberation made the shot. He then gazed at the balls a moment, laid down his cue and exclaimed: "I am satisfied."

"The score was then 1 to 0 in favor of the old farmer, but as Schaefer had agreed to make the game as long or short as the farmer desired he had to be satisfied. Schaefer of course had to invite all present, including his conqueror, to partake of the hospitality of the house. As the crowd laughed and drank Schaefer remarked that the game was the shortest he had ever played, and probably the shortest on record."—New York Tribune.

## INQUISITIVE SPARROWS.

**They May Have Been Hostile, but They Didn't Dare Attack the Cockatoo.**

There was trouble and to spare one day last week in a back yard on Brooklyn Heights. The cause of it was an innocent cockatoo which had flown away from home and found its way to the top of a tree near State street, between Henry street and Garden place. Where the strange bird came from there is no body to tell.

It was first discovered by the large and noisy colony of English sparrows which inhabits that vicinity. The first sparrow to see the foreigner lost no time in communicating the news of its discovery to its mates, and in three minutes no less than 50 sparrows had assembled to examine the strange visitor and exchange views about him. They took places on all sides of the cockatoo and began a chattering which soon attracted attention from all the neighboring windows. They hopped about from branch to branch, but never approached nearer than a yard to the puzzled stranger. For a time the cockatoo viewed the conclave about him with serenity, but the strain became too much for him, and finally found expression in a series of the most penetrating screeches, accompanied by the elevation of his light green plume, which had previously been partly concealed in his fluffy, snow white feathers. This demonstration added threat to the wonderment and fright of the sparrows and increased the volume of their chattering in like proportion.

But the unwelcome foreigner soon found that the chattering was harmless, and that the saucy sparrows lacked the courage to make an attack. Finding himself surrounded on all sides by the little nuisances, he gradually worked his way through one side of the circle and out on the end of a branch, where he perched contentedly and viewed his tormentors with the calmest indifference. Having found that the intruder would neither take nor give offense, the sparrows one by one flew away, leaving the cockatoo to take a nap in peace and quiet.

Meanwhile the cat colony of the back yards had been aroused by the unusual activity of the feathered tribe, and there had been a gradual concentration of the feline forces near the base of the tree which formed the cockatoo's perch. This meant a catfight as sure as preaching, and it was not long before the hostilities broke out. Then the dogs had their turn, and the cats disappeared, but to the last the cockatoo sat unruffled in his feathers in the tree top.—New York Sun.

## MODERN SHRAPNEL.

**DEADLY EFFECT OF THIS FEARFUL IMPLEMENT OF WAR.**

**What Happens When a Single Projectile Suddenly Bursts Into Two Hundred Separate Messengers of Death—Shells and Solid Shot.**

The improvements in modern guns have embraced all calibers, from that of the small arm firing a projectile only one-third of an inch in diameter to the monster which sends a solid piece of steel 12 inches through and weighing over half a ton. Not only have the guns improved, but also all their accessories, especially powder and projectiles. The smokeless powder of the present has changed the conditions of war almost as much as modern armament.

Keeping step with these advances have been those made in the various classes of projectiles. Even the smallest of these, with its case hardened bullet, is far ahead of the old fashioned lead bullet used in the small arms of 30 years ago.

One of the most effective of modern projectiles is the shrapnel. It is one of the forms of case shot. The others were the old fashioned grape and canister. A case shot may be said to be a collection of missiles in a case, which breaks up either in the gun or at some point in flight, thus setting free its death dealing particles.

As soon as the case is broken each of these particles goes on a separate path, and it's a sorry day for the man struck by one of them. All of these falling upon a piece of level ground would mark out an irregular oval, whose area varies with differing conditions. It has been found that the best point to burst the shrapnel is about six yards above and 50 in front of the enemy.

Colonel Shrapnel of the British service first invented shrapnel in 1803. This early form consisted simply of a spherical shell filled with bullets and a bursting charge of powder in the spaces between. This was a crude invention, which scattered the fragments too much and was liable to go off when not expected and not so when desired. This form was improved upon during our civil war, and the modern shrapnel can be considered the most dangerous of all life destroying projectiles. It consists of three parts—the tube, the base and the head. The powder charge is in the base, which is firmly attached to the body either by electric welding or by screwing. Leading from the base through the center of the body is a tube which is also filled with powder, which is ignited by the fuse at the point of the shrapnel and carries the fire to the main charge. Between 200 and 300 bullets rest upon a diaphragm just over the powder charge. These are held in place by a matrix of resin which is melted and poured upon the bullets when in place. A skeleton case of cast iron containing receptacles for each bullet is sometimes used instead of the resin.

The head is put on in the same manner as the base, and when the fuse is inserted the projectile is ready for use. Some shrapnels have the bursting charge in the head instead of the base. The fuse used is rather complicated, but the United States has as good a one as there is. It is a time fuse and in actual test has shown its reliability.

It can readily be seen that one great objection to the shrapnel is its high cost. The fuse alone costs about \$2.50. The same gun is usually supplied with three styles of ammunition—the solid shot, the shell and the shrapnel. Some batteries are also supplied with canister for use at close quarters. The bullets in the canister have a wider dispersion, because the case breaks up in the gun. Canister was used to repel the famous charge led by the Confederate general Pickett at Gettysburg. A perfect hail of missiles swept the slope leading up to Cemetery Hill, against whose destructive effects human valor was of no avail.

The shell is used to destroy inanimate objects as well as animate ones. It consists of a hollow cast iron shell, with a fuse and bursting charge of powder. The famous shot fired during the cutting of the cables at Cienfuegos is a good example of its use. The Spaniards having taken refuge in and behind a lighthouse, a shell was fired by one of our ships, which, striking it fairly, burst and utterly destroyed the structure, killing many of the soldiers.

But against men in battle formation the shrapnel is the more effective. It sends a perfect shower of missiles which, falling in the midst of a company, would almost annihilate it. Many tests have been made to show this.

Shrapnels fired from a gun a mile away in one instance and a mile and two-thirds in the other were made to strike a board target one inch thick. The fuses were set off by the contact and burst the projectile into 200 or 300 parts, each of which was capable of dealing death to any living thing in its path. Screens were placed at indicated distances behind the target. These may be considered as representing a battalion of infantry in column of companies. From the number of hits upon all of them the efficiency of shrapnel fire against close order formation may be judged.

In one shot 152 hits were made by a single shrapnel. In another 215 hits are recorded, but these are not so well scattered. Imagine, then, the effect of a well placed shrapnel upon a group of men such as is here represented.

The reader can readily understand why wars are now waged at greater distances and why hand to hand conflicts are almost unheard of.—New York Herald.

## LONG DISTANCE MAILS.

**Time of Letters From New York to Far-away Destinations.**

A letter sent from New York to Bangkok, Siam, travels overland to San Francisco and thence by water, reaching its destination in about 43 days, having been carried nearly 13,000 miles. A letter mailed here for Adelaide, Australia, also goes via San Francisco, travels 12,845 miles and is delivered usually within 35 days. New York mail destined for Calcutta goes by way of London, traveling 11,120 miles in 29 days, while mail sent from this city to Cape Town, goes 125 miles farther in two days' less time.

Mail communication between New York and Hongkong ordinarily consumes one month of time. The letters go by way of San Francisco and cover 10,500 miles of distance. To reach Melbourne, Australia, from this city a letter will travel 12,365 miles in about 32 days, and to reach Sydney a letter will travel 11,570 miles in 31 days. The mail route from New York to Yokohama, via San Francisco, is 7,348 miles long, and about 23 days are consumed in transit. To go to Honolulu from this city a letter travels 8,645 miles in 13 days.

Leaving New York on steamer days, mail matter is scheduled to reach Rome in about ten days, Madrid in ten days, London and Liverpool in eight days, Rotterdam in nine days, St. Petersburg in 11 days, Vienna in nine days, Paris in eight days, Berlin in nine days and Athens and Alexandria in 14 days. Communication with South American ports is much slower. It takes 24 days for a letter to go from New York to Rio Janeiro, which is only about 50 miles farther from this city than is Alexandria. Mail matter going from New York to Buenos Ayres, which is 8,045 miles distant, consumes 29 or 30 days. —New York Times.

## The English Flag.

England's national flag has been called "a triplet of crosses," for it is composed of the cross of St. George, the cross of St. Andrew and the cross of St. Patrick. Thus: The flag of "St. George for merrie England," a red cross on a white ground, the red lines drawn straight from top to bottom and from side to side; the flag of St. Andrew for Scotland, a white cross on a blue ground; the flag of St. Patrick for Ireland, a red cross on a white ground, the narrow red lines drawn from corner to corner. By placing the cross of St. George on that of St. Andrew we have "the Jack," as ordered in 1606 by James I, whose signature was always "Jacques;" hence the expression, "the Jack." By laying the cross of St. Patrick over that of St. Andrew and then placing that of St. George over both, we have "the union jack," as borne since the union with Ireland in 1800.—Boston Transcript.

## Seymour Should have the Convention.

The annual meeting of the State  
Sunday School convention, has usually  
been held in the central or northern  
part of the state. The executive com-  
mittee planned to hold the 1898 meet-  
ing in Seymour, but not receiving sufficient  
encouragement from the people here,  
the invitation from Greenfield was ac-  
cepted. If the Sabbath school work-  
ers of Seymour would get together now  
and unite in asking for the convention  
to be held here in the midsummer of  
1899 it can be secured. The convention  
here would be a benefit to the Sunday  
school work in Southern Indiana and a  
splendid advertisement for our enter-  
prising city. J. T. Erwin, of Scotts-  
burg, who is taking great interest in  
the matter will attend the Union  
Thanksgiving services here tomorrow,  
and he can give full information as to  
what can be accomplished. L

Judge Voyles' Funeral.

The funeral of the late Judge Sam-  
uel B. Voyles occurred at Salem this  
afternoon at 1:50 o'clock, and was in  
charge of the Masonic Lodge. The  
attorneys of the judicial district, gen-  
erally, were present. Those who at-  
tended from here were W. K. Mar-  
shall, O. H. Montgomery, Thos. M.  
Homan and W. T. Branaman.

DR. BULL'S COUGH SYRUP HAS  
been in use for half a century. Some  
families have used it for three gener-  
ations, and is today the standard cough  
remedy of this country.

DIED.

Louisa McCree, wife of the late  
Rev. Dr. McCree, died at her home at  
North Vernon at 8 o'clock, Wednesday  
morning, November 23, 1898, with in-  
firmity, aged 70 years. Deceased was  
a sister of J. H. Andrews, of Seymour,  
who with his wife went up there today.

Gamaliel S. Barnes, a respected citi-  
zen and prosperous farmer died Tues-  
day morning, November 22, 1898, at his  
home one mile north of Crothersville,  
with consumption aged 62 years. He  
leaves a wife and one daughter.

Archie Emhuff, a respected citizen  
died Tuesday night, November 22, 1898  
with dropsy, at his home at Bobtown,  
aged 58 years. A wife and four child-  
ren survive, who have the sympathy of  
all. Interment in Riverview cemetery  
at 3 o'clock tomorrow afternoon.

Work to Begin at Once.

The work on the new Christian  
church to be erected at the corner of  
Third and Poplar streets is to be begun  
at once. The contract for the excava-  
ting has been awarded to Mit Whitsett  
and he will go right to work at that.

When once begun the congregation ex-  
pects to push the work rapidly until  
the building is completed.

Balcony Seats are All Right.

The seats for this school entertain-  
ment at the Opera House tonight have  
sold rapidly. Nearly the whole of the  
lower floor has already been sold but  
the seats in the balcony will be espe-  
cially desirable for this performance.  
No one should miss it. The first num-  
ber of the High School Patriot will be  
distributed to the audience tonight.

Candidates for Judge.

It is announced that David M. Al-  
baugh, of Salem, Judge Ferrell, of Paoli,  
are also candidates for circuit judge and  
will ask Governor Mount for the ap-  
pointment. The only other candidate  
at this time so far as we know is Judge  
Marshall, of this city.

Postoffice Hours Tomorrow.

Tomorrow, Thanksgiving Day, the  
postoffice will be closed from 10:00 a.  
m. until 4:00 p. m. At 7:00 p. m. it  
will close for the remainder of the day.

I. H. WILHELM, P. M.

Lores Grimm of the Keene Stock Co.,  
of Cincinnati, aged 5 years, will recite  
"The Wreck of the Battleship Maine,"  
between the acts of "A Celebrated  
Case" at the Opera House Thanksgiving  
night.

## MARRIED.

Mr. Charles E. Vernerder, of Hunt-  
ington, Ind., and Miss Ella Champion,  
of this city were married last night at  
9 o'clock at the residence of the bride's  
parents on North Broadway, Rev. J. M.  
Baxter, officiating. The parties left on  
the 10 o'clock train north for their  
home in Huntington.

Clarence M. Blythe and Miss Knott,  
both respected young people of Sey-  
mour, were united in marriage at In-  
dianapolis, Tuesday, Nov. 15, 1898.  
Good luck and long life to them is the  
wish of their many friends.

### The High-School Patriot.

One of the interesting features of the  
rhetorical exercises at the high school  
each Friday afternoon is the reading of  
the High-School Patriot, edited by  
John Patrick, of the senior class. This  
week a special edition has been issued  
and several hundred copies have been  
printed for distribution. The paper  
does credit to the school and we be-  
lieve will prove a help to all who con-  
tribute to its columns.

## Circuit Court.

Tomorrow it is expected that the  
county clerk, auditor and sheriff will  
appoint some attorney to hold court  
until some one is appointed by Govern-  
or Mount to fill the vacancy caused by  
the death of Judge Voyles. Most of  
the Seymour attorneys will go down.

DR. BULL'S COUGH SYRUP is UN-  
equalled for bronchitis, loss of voice,  
hoarseness and other throat and lung  
affections. It cures more quickly than  
any other medicine.

## Funeral Notice.

The funeral of Miss Lizzie DeGolyer  
will take place from the St. Ambrose  
Catholic church tomorrow, Thursday,  
morning at 9:30 o'clock. From 8  
o'clock Thursday morning the remains  
will lie in state at the residence where  
they may be viewed by friends.

## CHURCH NOTES.

There will be an Epworth League  
social tomorrow evening at the home of  
Miss Clara Childs on 3rd street. All  
members and friends of the League are  
invited.

The members of the M. E. church  
and Sunday school are requested to  
bring or send to prayer meeting this  
evening small or large packages of such  
things as needy people need for food.  
Let us do a little to make others have  
reason to be thankful tomorrow. The  
provisions will be distributed to the  
proper persons by Epworth League  
committees.

DR. BULL'S COUGH SYRUP WILL  
positively cure cough. Many a home  
has been made desolate by the loss of a  
dear child which could have been saved  
by this great remedy.

to attend the funeral of Miss Lizzie  
DeGolyer.

## Columbus to Get a Canning Factory.

A few days ago it was noted that  
Pres. on Ryder had a tempting propo-  
sition to locate a canning factory at  
Scottsburg and that the plant here  
would probably be moved there. Now  
the Columbus papers say that a com-  
mittee of citizens there has closed a  
contract with Mr. Ryder to move his  
plant from Crothersville to that city.  
It is probably not true that Mr. Ryder  
means to relocate both the plant here  
and the one at Crothersville, but we  
understand that the offer from Colum-  
bus is a generous one and that one of  
the plants will be moved there before  
the next canning season.

## RAILROAD RUMBLINGS

Several people from here went to Medora Sunday to see Geo. Waskom, who is very low at this writing.

Mrs. Jennie Lohman and son, of Medora, are visiting the former's mother and the latter's grandmother at this place.

### Discovered by a Woman.

Another great discovery has been made, and that too, by a lady in this country. "Disease fastened its clutches upon her and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent. For three months she coughed incessantly and could not sleep. She finally discovered a way to recovery by purchasing of us a bottle of Dr. King's New Discovery for Consumption and was so much relieved on taking first dose that she slept all night; and with two bottles, has been absolutely cured. Her name is Mrs. Luther Lutz. Thus writes W. C. Hamrick & Co., of Shelby N. C. Trial bottle at W. F. Peters Drug Store. Regular size 50c and \$1.00. Every bottle bottle guaranteed.

### A BEE'S RESTLESS LIFE.

It Begins Work When Three Days Old and Dies at Forty-five.

G. W. Reynolds of Los Angeles, one of the oldest traveling men in the United States, has a ranch of which he enjoys telling even more than he does of the experiences through which he has passed during his half century upon the road. The ranch is near San Diego, Cal. The chief product is honey. This product is gained from two apiaries, which Mr. Reynolds visits every time his business permits him to go to southern California.

"In my apiaries, which are cared for by my son," said he, "there are 140 stand of bees. The honey season lasts from April to July. Last season my bees yielded 40,000 pounds of honey, which sells in that country in bulk lots at 4 cents a pound. Two of the hives gave over 500 pounds each. For ten years I have been interested in bees in this every year. A hive or stand of bees is worth \$2.50. In it are the queen, the drones and the workers, a total population of from 20,000 to 35,000 bees.

"This very good sized colony," he continued, "resides in a hive or wooden box. In the hive are a dozen frames 13 by 7 inches. In these the bees make or deposit the honey, a foundation of wax having been first placed in each frame by the beekeeper, so that the bees may have something to build upon. The honey is taken out of the frames every other week during the honey season. While doing so there is little need of protecting the hands. The bees seem to be most inclined to sting one in the face. So, as a precaution, the man who is removing the honey from the hives wears a straw hat, from the brim of which is hung a silk veil, like they have to do up in the Klondike country to ward off the summer mosquitoes.

"The queen is an absolute monarch within her dominions. She is the undisputed boss of the job. An ordinary bee lives during the working season only 45 days. Young ones are being hatched out all the time. A bee goes to work at the tender age of 3 days and hustles like a veteran for 42 days. Then it is just naturally all tired out, I suppose, for it dies. The queen lives longer, and when a young queen comes into existence in the hive she drives the old queen out. Her loyal subjects follow her in her banishment, and that is what makes the swarm.

"In southern California the bees make water white honey when the black sage is in blossom. When the white sage is flowering, the honey has an amber tinge. In winter the bees make no honey. Seventy-five carloads of the article are shipped out of San Diego county in good years."—Denver Republican.

### Dangers From Violent Exercise.

There is considerable diversity of opinion as to the safety with which women may indulge in violent exercise in view of possible injury. As regard the heart, there appears to be but one opinion—namely, that that organ, accustomed to a quiet life, may be dangerously and permanently crippled by the excessive strain in athletic sports. Experience in medical practice, says an eminent authority, teaches that the patient with a weak heart must be extremely cautious in his exercises, and the demonstration of a dilatation of the healthy heart under sudden, violent, exhausting effort which has been made was of a surprising nature. Many clinical observers in Germany and in this country have detected by percussion and observation of the changes in the heart beats that there is under strain and exertion considerable dilatation, which continues for a shorter or longer time after the exertion is over. Ocular proof of this has been afforded by the Roentgen rays. This shows not only the need of caution by those in good health, but more particularly so in the case of those who suffer from any weakness, constitutional or otherwise, in this organ.

Bound Over to Court on a Charge of Attempting to Poison Her Son.

### CHECKS MUST BE STAMPED

False Impression Corrected by the Commissioner of Internal Revenue. Young Man Scalded Until the Flesh Peels From His Body—Going to India as a Missionary.

Princeton, Ind., Nov. 23.—Justice Corrier rendered his decision in the Rosenberg poisoning case yesterday, binding the defendant, Mrs. Rebecca A. Rosenberg, over to the next term of the Gibson circuit court, bond being placed at \$5,000. The attorney in the case objected to the size of the bond, and it was finally reduced to \$1,000. Dr. O. L. Hudson, at whose home the defendant is housekeeper, became surety. The prosecuting witness, Alva Rosenberg, was placed under \$500 bond. The defendant maintained her usual calm and unconcerned manner during the ordeal.

### MECHANIC'S LIEN.

Decision by Supreme Court as to Its Effect on Mortgages.

Indianapolis, Nov. 23.—The supreme court yesterday decided the suits in which the Deming Colburn Lumber company foreclosed a mechanic's lien on some property without making the mortgage a party. A suit to foreclose the mortgage was begun after the year allowed for foreclosing the mechanic's lien had expired. The supreme court holds that a mechanic's lien must be foreclosed within a year, and that a person not made a party to the foreclosure suit is not bound by it after the year has expired.

### BOILER EXPLODES

Scalding a Young Man Until the Flesh Peels From His Body.

West Fork, Ind., Nov. 23.—By the explosion of a traction engine boiler near here, William Festler is probably fatally scalded. The young man stood with his back to the boiler, when the end blew out and scalded him from head to foot. His head was totally denuded of hair and the flesh peeled from his body while his clothes were being removed.

### MEMBERS OF 159TH

Will Eat Their Thanksgiving Dinner at Home, Says Captain May.

Indianapolis, Nov. 23.—Captain May, the mustering officer, says all the members of the One Hundred and Fifty-ninth regiment will be mustered out by tonight. He said it was his determination that all the boys should have the opportunity to enjoy their Thanksgiving dinner with their friends. Two paymasters are at work paying off the regiment.

### Judge Gillett Prejudiced.

Hammond, Ind., Nov. 23.—Judge Gillett will not try the Hillis injunction suit, in which L. G. Hillis, a Chicago lawyer, sought to restrain "Jimmy" O'Leary and others from operating a poolroom at Roby. Prejudice against the defendants and gamblers in general is the reason stated by the judge for his refusal to hear the case. Special Judge Hubbard of Warsaw has been called to hear the case at Crown Point next Saturday.

### Son Against Father.

Spencer, Ind., Nov. 23.—William Christenberry has caused the arrest of his father, J. W. Christenberry, on a charge of assault with intent to kill David Hendricks, a son-in-law of the elder Christenberry. The affidavit alleges that upon failure to receive a settlement on account, he shot at Hendricks, using a rifle. Darkness prevented accuracy of aim and the bullet went wild.

### Watchman to Be Tried for Murder.

Laporte, Ind., Nov. 23.—James J. Gray will be placed on trial this week for murder. Gray was a railroad watchman for the Michigan Central. While in the discharge of his duties, it is alleged, he saw a man named Kennell forcing his way into a freight car. Gray sent a shot after Kennell, and it was on the latter's deathbed statement that Gray was indicted.

### Going to India as Missionaries.

Middlebury, Ind., Nov. 23.—Dr. Page, pastor of the Amish Mennonite church here has resigned his charge, and will leave in a few days for New York city, from whence he will sail for India, to spend three years in missionary work. He will be accompanied by Mrs. Page, who will also engage in missionary work.

### \$16,000 Fire at Brownstown.

Brownstown, Ind., Nov. 23.—The most damaging fire in the history of this town broke out yesterday, originating in Joseph Goss's dry goods store and rapidly spreading to other buildings, being fanned by the high wind which was blowing. The property loss amounts to \$16,000.

### William Havens, Sr., Dead.

Rushville, Ind., Nov. 23.—William Havens, Sr., one of the most prominent citizens of this city, is dead of paralysis. He was born in Highland county, O., in 1820. He was a son of Rev. James Havens, a pioneer Methodist minister, known everywhere as the "Fighting Parson."

### Postoffice Robbed.

Vistula, Ind., Nov. 23.—Burglars entered the postoffice here and secured about 100.

### Weather.

Indiana—Fair and cold.

### Lung Irritation

Is the forerunner to consumption. Dr. Bell's Pine-Tar-Honey will cure it and give such strength to the lungs that a cough or cold will not settle there. Twenty-five cents at all good drug stores.

It is impossible to promise particular features that will appear in the "AMERICAN MONTHLY" during the coming year, for it is, as the Bookman says, "a great monthly newspaper." As such, it prints for its readers an illustrated account of the notable things which make the history of the month, of the political, economic, and literary happenings which are of value to intelligent men and women. The Editor's "Progress of the World" tells succinctly an illustrated story of the month. The "Leading Articles" give the best thought and information of the current magazines in five continents; the contributed articles furnish the character sketches of the man of the month, and give timely discussions by authorities on any question of immediate serious import.

The result of this comprehensive effort to edit in one monthly volume the information needed by intelligent people of "live" instincts is best gauged in the opinions which the readers of the AMERICAN MONTHLY have seen fit to express. These are thinking business men, clergymen, editors, lawyers, professors, engineers, the wide-awake women of America. They write that the AMERICAN MONTHLY "is indispensable"; "is simply invaluable"; "is a generous library in itself"; "is a historical cyclopedia of the world"; "the best means of aid for a busy man"; "the best periodical of the kind we have ever had"; "a triumph of editorial genius"; "the world under a field-glass," etc., etc.
